|---|---|
| Web Technologies | HTML/HTML5, CSS/CSS3, SASS, JavaScript, Bootstrap, Angular, Node js, Express, MySQL. |
| Methodologies | Agile. |
| IDE's | VS code, Webstrom. |
| Version Controls | Git. |
| Operating System | Windows. |
| Testing | Jasmine, Karma. Mocha, Chai. |

## PROFESSIONAL EXPERIENCE:

**Project**: **Secure ID**

**Client**: **T-Mobile**

**Description:** T-Mobile is the one of the top network operator in US which provides the wireless voice and data services and which has various clients throughout the world. In this project we build the UI and backend services for User Login, Signup, Forgot password and Profile flows to support the all clients of T-Mobile. We provide the security on user login and provide the security for user Information from thefting.

**Responsibilities:**

- Developed various Libraries to support in Micro Service Architecture.
- Worked on the Authentication and Authorization
- Built the various RestFul Api's and intergrated those api's with thr Frontend in Angular.
- Created User controls, Web Forms and client side validations using Javacript and Angular.
- Worked on the customization to alter the UI/UX for different clients.
- Worked on Unit Test cases both in Angular and Node.

**Environment:** NodeJs, Express, Angular, MySql, HTML5, Sass, Bootstrap, Splunk, Grafana.

**Project: Mobile Asset Management**

**Description:** Mobile Asset Management is an interface between the Mobile Asset Management Team which is handled by the IT Team and Employees of ProKarma. The employees can request the mobile devices for testing their respective mobile applications. Request is passed to the respective Project Manager. On approval by the manager, the request is passed to IT Team. Depending on the availability of requested mobile the IT Team can assign the mobile to the respective employee and after usage of the mobile which was used that mobile has to be returned back to IT Team. Only IT Team has a right to access and manipulate the mobile devices in the inventory.

**Responsibilities:**

- Creation of UI pages using AngularJS.
- Views are Responsive using Bootstrap.
- Developed the controller logic using Spring MVC.
- Mapped relational Data Base using Spring JDBC.
- Developed RESTful web services using Spring REST.
- Responsible for Integration testing.

**Environment:** Java 1.6, Spring MVC, Spring JDBC, Spring REST, AngularJS, Bootstrap, Karma-Jasmine, Junit, Tomcat and Oracle.

## EDUCATION:

Bachelor of Technology in **Mechanical**          **June 2013 to  Apr2017**
from **JNTU-A (Ananthapuram)**.                   **CGPA: 7.97/10**
